

Steps to create a PDF/ A-1b compliant document from a PDF file for PC Users

Software Required: Acrobat Professional 9, Acrobat Distiller 9

For PC users:

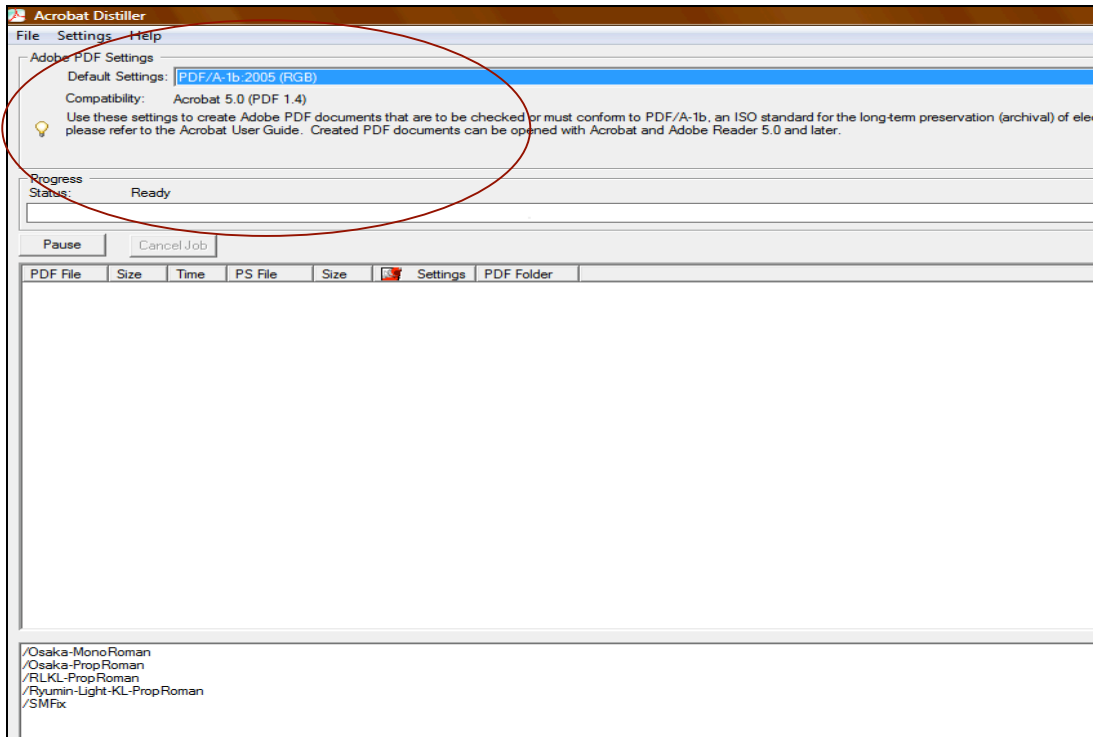

1. Create a PDF file of your ETD using any authoring application of your choice (e.g.: MS Word)
2. Open this PDF using Acrobat Professional 9
3. Click on the File menu and choose the Save As option
4. In the dialog box that pops up, from the lower left corner, choose the Format to be Post Script. Use a new name to avoid over-writing the original PDF document. (Screenshot 1)

Screenshot 1. Saving a PDF file as a postscript file

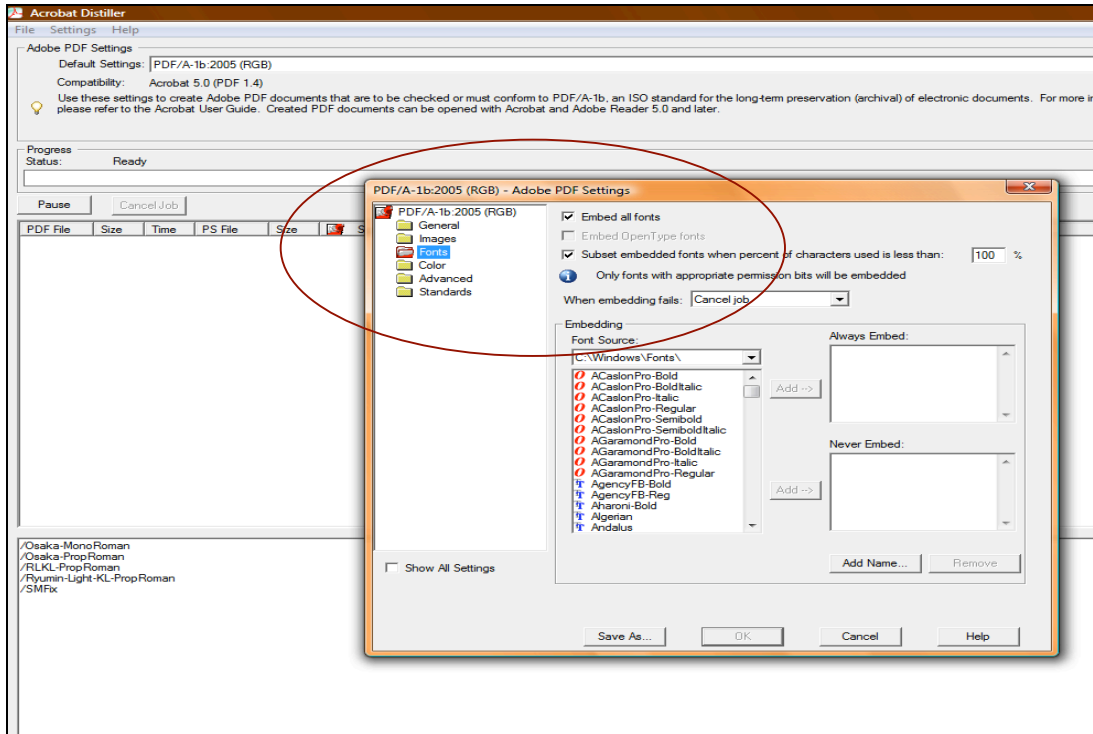

5. Open Acrobat Distiller 9. It is usually found in Start Menu → Programs → Adobe Acrobat 9 Professional → Acrobat Distiller.
6. In the dialog box that pops up on opening Distiller, set the Default settings to PDF/A – 1b:2005(RGB) (Screenshot 2)

10. A PDF file will be created from the Post Script file (Screenshot 4)

Screenshot 4. Creating a PDF file from the postscript file using Acrobat Distiller

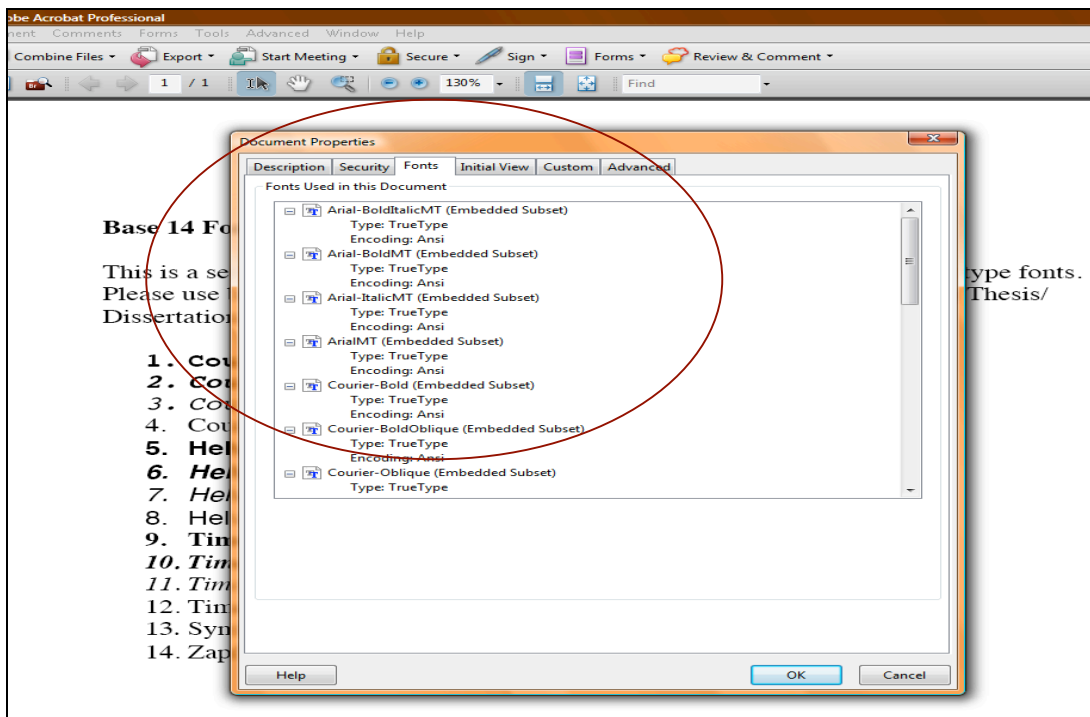

11. Open the PDF file created by Distiller using Acrobat Professional. You will see a blue information bar at the top of the document with the message:

“You are viewing this document in PDF/A mode”.

12. From the File menu, choose the Properties option

13. Choose the Fonts tab

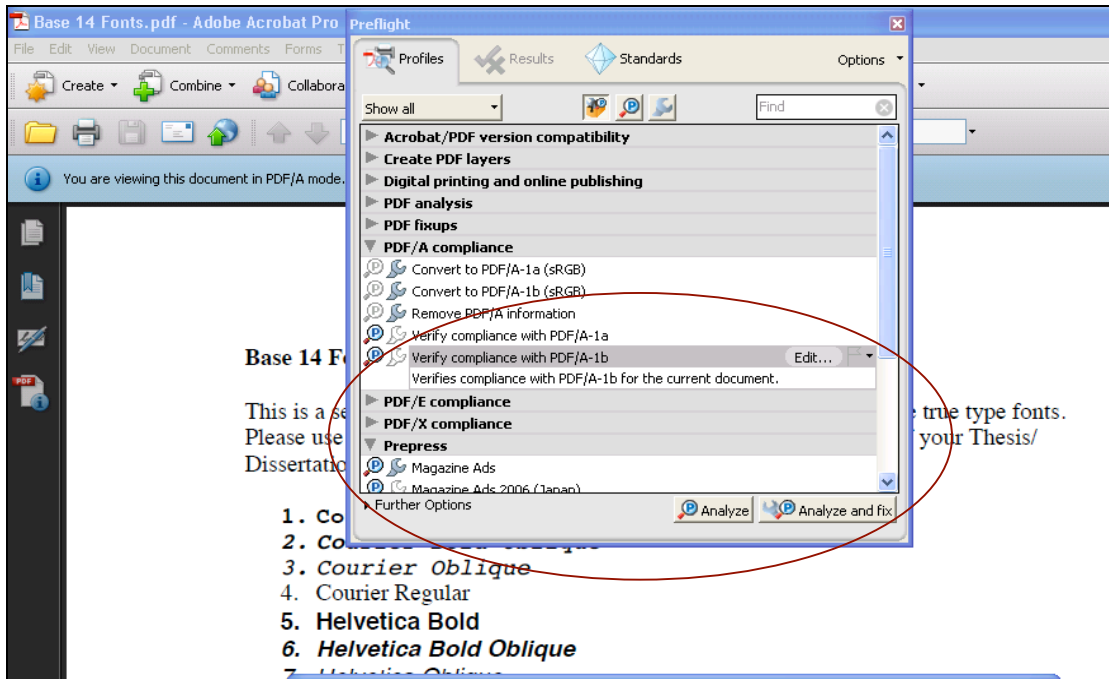

14. A list of embedded fonts will be listed. Ensure that all the fonts that you had used in your original document are embedded. (Screenshot 5)
