

ACTIVE FLOW CONTROL FOR REDUCTION OF HIGH CYCLE FATIGUE IN ENGINE BLADES

Jinwei Feng

Dissertation submitted to the Faculty of the
Virginia Polytechnic Institute and State University
in partial fulfillment of the requirements for the degree of

Doctor of Philosophy
in
Mechanical Engineering

Dr. Ricardo A. Burdisso, Chairman
Dr. Wing F. Ng
Dr. Harry H. Robertshaw
Dr. Alfred L. Wicks
Dr. Theodore S. Rappaport

October, 2000
Blacksburg, Virginia

Keywords: Active Flow Control, High Cycle Fatigue, Trailing Edge Blowing,
Aeroacoustics
